## ■ Program for Strengthening Data Infrastructure for the Humanities and Social Sciences

- By Japan Society for the Promotion of Science
- From 2023 Until 2027 (tentative)
- (For short “Current Program”)
  
- This is a program premised on the Program for Constructing Data Infrastructure for the Humanities and Social Sciences, 2018-2022.
  - (For short “Constructing Program”)

## ■ Objective

- Enhancement and reinforcement of data platforms and infrastructures to promote data sharing and utilization in the humanities and social sciences
- Aiming to encourage researchers to share data with each other and to promote joint research, etc. in Japan and other countries.

JDCat was created to allow the batch retrieval of metadata (e.g. the contents, contexts and sources of data sets) across fields of the humanities and social sciences. Metadata from the research institutions commissioned to operate this program (“Hub institutions”) can be retrieved in batches.

<https://jdcats.jsps.go.jp/JDCatmetadata.html>

## ■ For batch retrieval: JDCat metadata

- We have separately prepared metadata to be provided to users and metadata to be harvested from hubs.

## ■ JPCOAR : For Humanities

- JPCOAR schema is aimed at improving the international interoperability of Japanese institutional repositories and promoting the smooth distribution of Japanese research products.
- <https://schema.irdb.nii.ac.jp/en>

## ■ DDI (Data Documentation Initiative): For Social Science

- DDI is a metadata schema for describing data in the social and behavioral sciences and related fields.
- DDI is used in the CESSDA Data Catalog (→ Standard Metadata)
- <https://ddialliance.org/>

## ■ Two Types available:

- OAI-PMH (Open Archives Initiative Protocol for Metadata Harvesting)
- ResourceSync

## ■ Harvest frequency: once a month

- From each institution's repository

## The Kanazawa Bunko Documents (金沢文庫文書)

The collection consists of 4,149 items. (Mainly letter)

Held by Kanagawa Prefectural  
Kanazawa-Bunko Museum

The Kanazawa Bunko Documents are designated as a Japanese National Treasure. Fundamental historical material for the study of medieval Japanese history. It is also notable as a document that conveys the situation in East Asia from the late 13th to the early 14th century, which was greatly influenced by the Mongol Empire.

SSJDA Data Analysis	Not available	
Summary	The Japan Institute of Life Insurance and Nomura Research Institute conducted a joint study of women in order to grasp, from the most comprehensive perspective possible, "changes in the social environment surrounding women" and "the actual state and consciousness of women in the fields of life and work." As part of the study, two questionnaires are introduced here: one directed to citizens at large and the other, to businesspersons. The study also includes interviews with and a questionnaire survey of well-informed people as well as an analysis of data. The citizens' questionnaire aims at clarifying women's life structure, values, and work consciousness, and its items include life structure, values, consciousness about security of life, state and consciousness of work, and activities outside the household. The purpose of the business people's questionnaire is to investigate women's changes as observed by a section-managing class of the corporate management, and it looks into changes in selected attributes of employed women, changes in the form of employment and job description, changes in women's consciousness, and other related matters.	
Data Type	quantitative research: micro data	
Universe	1. Businesspersons' questionnaire 2,500 managers at section management levels at listed companies nationwide, and 500 personnel department managers at listed companies nationwide. 2. General citizen's questionnaire Women aged between 18 and 59.	
Unit of Observation	Individual, Organization	
Sample Size	1. 581 responses from a sample of 3,000 managers (Rate of return: 20.6%) 2. 2,423 responses from a sample of 3,000 women (Rate of return: 80.8%)	
Date of Collection	1980-07 - 1980-10 1. July - August, 1980 2. October, 1980	
Time Period	1980 - 1980	
Spatial Unit	Japan 2. All over Japan (220 localities)	
Sampling Procedure	Probability: Stratified Probability: Multistage Other 1. Section managers born in 1935 and after were randomly sampled from the Diamond directory of company employees. (Note that the sampling ratio was adjusted to avoid a wide inter-company variation in the number of individuals sampled.) Personnel department managers were randomly sampled (one per company) from listed companies. (Note that their representativeness of the population is limited due partly to unavailability of lists.) 2. Stratified two-stage random sampling	
Mode of Data Collection	Face-to-face interview Self-administered questionnaire: Paper 1. Record and mail systems 2. Record and interview systems	
Investigator	Japan Institute of Life Insurance and Nomura Research Institute	
DOI	10.34500/SSJDA.0034

### Photographs (7930)

#### Yoshimichi Ogimoto (5880)

ここに公開する約22,000枚の写真は、放送カメラマンの大木本美通氏がお仕事のかたわら個人的に撮影されたものです。  
震災直後から2002年1月まで、大木本さんのお仕事場に近い三宮・元町周辺のほか、神戸市内の様々な地域を丹念に歩かれて、この膨大な資料が生まれました。  
今回、大木本さんの記憶・記録と震災文庫による調査を総合して、できる限り撮影場所の特定・キャプション付与を行い、貴重な記録写真をインターネットを通じて広く公開します。

#### 撮影者、大木本美通さんのメッセージ

6,400名余の犠牲者を出した阪神・淡路大震災から7年と5ヶ月が経ちました。倒壊した建物や道路、鉄道、港湾施設、廃墟と化した火災被害の商店街や住宅地...震災後、神戸の被災地を歩き始めて感じたこと、それは人々の生活再建に対する不安感、総てを失った喪失感であったように思います。しかし反面、“一日も早く元の生活を取り戻したい”“負けてたまるか”という被災者の強い意志の表れは、全国から寄せられた救援の手やボランティアの活動、地域住民同志の支え合い、行政側の復興施策の後押しもあって、厳しさの中にも着実に再興への歩みを刻んでいるように思います。

写真は傷ついた街の復旧と復興、慰霊と鎮魂、防災と新しい街づくり、他に神戸まつりや明石海峡大橋開業、淡路花博など復興期と並行して開催された催しも含め折々に写したものを掲載しました。

記憶を記録にとの思いで写し始めたのがきっかけでしたが、この度、神戸大学附属図書館震災文庫のお力添えで公開される機会を得られましたこと、震災の教訓を生かすうえで、今後多少なりともお役にたつことができれば、と思っております。

2002年6月10日 大木本美通（撮影者）

# Program for Strengthening Data Infrastructure for the Humanities and Social Sciences

## Overview of the Program

The "Program for Strengthening Data Infrastructure for the Humanities and Social Sciences" aims to enhance and strengthen JDCat. This data platform promotes data sharing and utilization in the humanities and social sciences so that researchers can share data and promote collaborative research in Japan and abroad.

This website is operated by the Historiographical Institute and the Institute of Social Science, The University of Tokyo, commissioned by the JSPS as the Participating Institution (Headquarters) of the JSPS "Program for Strengthening Data Infrastructure in the Humanities and Social Sciences" Grant Number JPJS00320231001.

Overview of the Program

Representative Greetings

Project Structure

- “Program for Strengthening Data Infrastructure for the Humanities and Social Sciences”
  - JDCat, metadata, contents, organization and its functions
- The development of research data infrastructures is progressing in many countries, For example, in Europe,
  - DARIAH is a leading initiative for Digital Humanities.
  - SESSDA (Consortium of European Social Science Data Archives) is an initiative to realize cross-search of social science data archives.
- This program is the only research data infrastructure for the humanities and social sciences in Japan.
  - Irreplaceable.
  - However, the budget is very small.
- Future work
  - There is no crosspoint between data from the humanities and social sciences yet.
    - It is necessary to improve the environment so that collaborative research that intersects data from the humanities and social sciences can be realized.
    - For this purpose, it is essential to increase the data in JDCat. The addition of data should be promoted.
  - It is essential to provide data that can be used for AI and machine learning.
    - Currently, metadata can be downloaded from JPCOAR and DDI.
    - Links to the actual contents are provided by DOI...
    - We would like to re-examine the method of use considering the diversity of the data.

Thank you for listening to my presentation.

This work was supported by JSPS KAKENHI Grant Number JPJS00320231001 (Program for Strengthening Data Infrastructure for the Humanities and Social Sciences).

24H00011(Grant-in-Aid for Scientific Research(S)), and  
23HP7002(Grant-in-Aid for Publication of Scientific Research Results(Database)), too.
